MR. QUBE-SUMER

Your button touching has really made things happen!

On May 17th, County Prosecutor George Smith joined us to find out how little we all know about car repairs. We presented you with three sets of circumstances, as any consumer would explain to a head mechanic when bringing in a car for repairs, and had three "mechanics" tell you what needed to be done to your car.

Unfortunately, only one of the three "mechanics" was real. Ron Stein of Clintonville Auto helped draft the questions and the answers so that for each circumstance only one answer and, therefore, only one specific repair, was correct. The other two "mechanics" were Qube employees.

If this sounds confusing to you, don't worry. It's confusing to all of us. And that's why we wanted Prosecutor Smith present when it was demonstrated that most of us have no idea whatsoever if the repairs which our auto mechanics say are needed *actually are*. As a matter of fact, over 50% of us chose the wrong mechanic and the wrong repair.

Now this points up all too clearly that something has to be done to ensure that mechanics are trained and know what they're talking about. Ohio has good laws to protect us if we've been cheated or intentionally ripped-off. But there are no laws requiring any training or particular skills for someone who works on our cars. And cars are our second biggest investment in life. And it's an on-going investment.

Prosecutor Smith, in his role as Chairman of the New Legislation Committee of the County Prosecutors Association, recommended only four days after being on our show that Ohio auto mechanics be voluntarily certified in specific areas, such as transmission work. That way we'd know if the guy working on our cars knew what he was doing.

In proposing his program on May 22nd, Mr. Smith said that he was taking action because "(My) decision to take some definitive action followed a May 17th appearance on Warner Cable's Qube in which a consumer poll showed that more than 85% of the viewing audience favored some government action in the field of automotive repairs."

Many groups and organizations have already announced support for Prosecutor Smith's actions — actions which were prompted by *your* button touching.
